

# CORESENSE CONNECT™ MOBILE POINT OF SALE

## Service Customers Anywhere, Anytime

CORESense Connect™ Mobile Point of Sale solution incorporates the power and functionality of CORESense's enterprise class Point of Sale workstation into mobile devices allowing retailers to service their customers anywhere, anytime.

Built on the jQuery Mobile touch-optimized web framework, CORESense Connect™ is the first solution that is compatible with all major mobile platforms as well as all major desktop browsers including iOS, Android, Blackberry, WebOS, Symbian, Windows Phone 7, and more. Retailers can now leverage the optimum device for their mobile applications.

With a lightning fast and intuitive user interface and seamless back office integration, CORESense Connect™ provides staff with complete product and customer information including inventory levels, configuration details, cross sale and up sale options and full order and return history. It also plus full checkout capabilities so staff can provide complete sales and service support – without ever leaving the customer's side.

The result is that your staff can service customers in store or in the field and deliver a more personalized and effective shopping experience increasing customer satisfaction and driving higher sales.
