

Focus on Automotive Aftermarket

CORESense's market leading Automotive Aftermarket Solution is purpose built to meet the unique and demanding e-Commerce, Order Management and Inventory Management needs of aftermarket dealers. We have been successfully increasing sales and cutting cost for our aftermarket clients since 2001.

Year/Make/Model/Part Fitment

Advanced year/make/model/part filtering and attribute-based search capabilities make it easy for your customers and service reps to quickly locate the right part.

Multi-Website and Multi-Channel Selling

Easily sell products from one centrally managed catalog through one or more uniquely branded B2C and B2B web sites, eBay, Amazon and 3rd party web sites.

Create and Manage eBay Listings

Push products to eBay.com and eBay Stores directly from the CORESense product catalog using eBay's new Parts Compability Listing capability maximizing product visibility and placement.

Minimize Inventory/Maximize Stock Availability

Real-time synchronization of sales and inventory across multiple stores and channels combined with automated re-ordering and drop-ship or just-in-time fulfillment ensures you're never out of stock while minimizing inventory costs.

Integrate and Streamline Operations

Eliminates management issues and inefficiencies caused by managing separate systems, difficulty tracking large quantities of parts and rising demand for a multi-channel presence for both B2C and B2B business. Having one solution provides operational efficiencies and clears the way for exponential sales growth.

We Know the Automotive Aftermarket

CORESense has extensive experience working with Aftermarket retailers to help manage the complexities of this business and enabling an increase in revenue and decrease in operating costs in this competitive market.
